PROFESSIONAL SUMMARY

Entry-level MERN Stack Developer with hands-on internship experience building full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, authentication, role-based access, responsive interfaces, and real-time application features. Built practical projects including an Instagram Clone, e-commerce platform, cab booking application, and HRMS. Quick learner with a strong interest in React.js and Node.js development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, React Router, Axios

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control

Database: MongoDB, MySQL, Redis

Real-Time: Socket.IO, WebSockets

Architecture: Microservices, API Gateway, RabbitMQ

Tools: Git, GitHub, Docker, Postman, VS Code

EXPERIENCE

MERN Stack Developer Intern | Beleaf Technology Solutions 03 Jun 2026 – Sep 2026

- Developed full-stack web application features using React.js, Node.js, Express.js, and MongoDB.
- Built and integrated REST APIs with frontend applications and backend services.
- Worked on authentication, database operations, responsive UI development, and protected application flows.
- Collaborated with the development team on feature implementation and live project development.

PROJECTS

Instagram Clone

React.js | Node.js | Express.js | MongoDB | JWT

- Developed a social-media application with user authentication, profiles, posts, likes, comments, and follow/unfollow functionality.
- Created REST APIs and MongoDB models for users, posts, and social interactions.
- Built responsive React interfaces with protected user flows.

Multi-Vendor E-Commerce & Order Management Platform

React.js | Node.js | Express.js | MongoDB | MySQL | Redis | RabbitMQ | Docker

- Built an e-commerce platform covering authentication, vendors, products, inventory, orders, payments, and notifications.
- Implemented JWT authentication, role-based access, service communication, and Redis-backed workflows.
- Designed order and inventory workflows with Docker-based local infrastructure.

RideGo – Cab Booking Platform

React.js | Node.js | Express.js | MongoDB | Socket.IO

- Developed customer, driver, and admin workflows for a MERN-based cab booking application.
- Implemented ride booking, driver matching, real-time driver location updates, and ride status tracking using Socket.IO.
- Built REST APIs and responsive interfaces for booking and management workflows.

HRMS – Human Resource Management System

React.js | Node.js | Express.js | MongoDB | JWT

- Built an HR management application for employee records, attendance, leave requests, and payroll workflows.
- Implemented authentication, protected routes, and role-based access.
- Created responsive management screens with forms, validation, search, and filtering.

CERTIFICATIONS & ADDITIONAL

- AWS Cloud Computing Workshop
- Artificial Intelligence and Machine Learning Workshop

EDUCATION

Bachelor of Computer Application (BCA) 2022 – 2025

The American College | 9.0 CGPA | Top 10% of graduating class
